Re: Property renovation

Brunswick, Georgia has grown exponentially over the past years in population, economy, and stature. It is with that backdrop that the Econo Lodge (Perry Lane Road) has re-invested over \$250,000 into fully renovating the 69 room quaint property. All rooms now dawn newly installed wood floor look, dressed with Choice Hotels International's custom paint accent walls. To ensure comfort and based on room space, the second level bedding has been converted to Queens with an elevated 9" frame complimented by a furniture package that brings the split window drapes and all 69 rooms together. All rooms now come equipped with microwave and refrigerator and for convenience, we have installed Fiber-Optic Internet for faster speed and greater bandwidth so work or play does not have to be a drag.

If you are an early riser, our fitness room (though small) has all you need to get going with newly installed Profoma I-Fit treadmill. It allows you to log in via the Internet and exercise with your friends or class as you would at home. If that doesn't get you going we have completely re-done the breakfast offering to include a new display and setup, boiled egg, yogurt, pancakes and more. Classy brown marble now adjoins all surface area for cleanliness, and we have opened up the lobby to make it more spacious. The 24 hour coffee, hot chocolate, oatmeal, grits and tea bar that everyone has grown to love has not changed except for the display containers so it can have a modern look. All the carpet throughout the property has been re-padded and changed to match the custom color of the hallway along with its posh scene.

We renovated to say thank you and to show that we were listening to your concerns. Thank you and enjoy.
